ABOUT ME

Aspiring BCA student with a passion for frontend development, dedicated to becoming a skilled and successful developer. A quick learner with a creative mindset, constantly improving my expertise in web technologies. Self-motivated and adaptable, always eager to tackle challenges with innovative solutions. Committed to building user-friendly and visually appealing web applications. Continuously learning and staying updated with the latest industry trends to achieve my career goals.

PROJECTS

Project Title: Job Portal – Java Application

Technologies Used: Core Java, JDBC, MySQL

- Developed a console-based job portal with structured user roles: Admin, Employer, and Job Seeker.
- Enabled job seekers to register, log in, search jobs, and apply directly.
- Allowed employers to manage company profiles, post vacancies, and review applications.
- Integrated MySQL database using JDBC for secure and efficient data handling.
- Demonstrated strong skills in object-oriented programming and backend logic.

Project Title: Furniture E-Commerce Website

Technologies Used: HTML, CSS, JavaScript, Bootstrap

- Designed and developed a responsive e-commerce website for furniture products.
- Implemented dynamic product displays with hover-to-add-cart functionality.
- Created a smart cart sidebar with real-time item updates for a seamless UX.
- Optimized the site for both desktop and mobile devices using responsive design.
- Enhanced front-end skills by building an interactive, user-focused web interface.
